The OSHA excavation safety regulations, "Construction Standards for Excavations," have enormous impact on the construction industry. These regulations require a "competent person" at the excavation site who is capable of identifying existing and predictable hazards and who has the authority to take prompt and corrective measures to eliminate the hazards. This seminar will help you:

- Comply with OSHA's Construction Standards for Excavation
- Determine the role/responsibility of the competent person
- Understand OSHA's fine/penalty structure
- Develop a comprehensive excavation safety plan
